

# CONSTRUCTION ADVISORY

September 2010

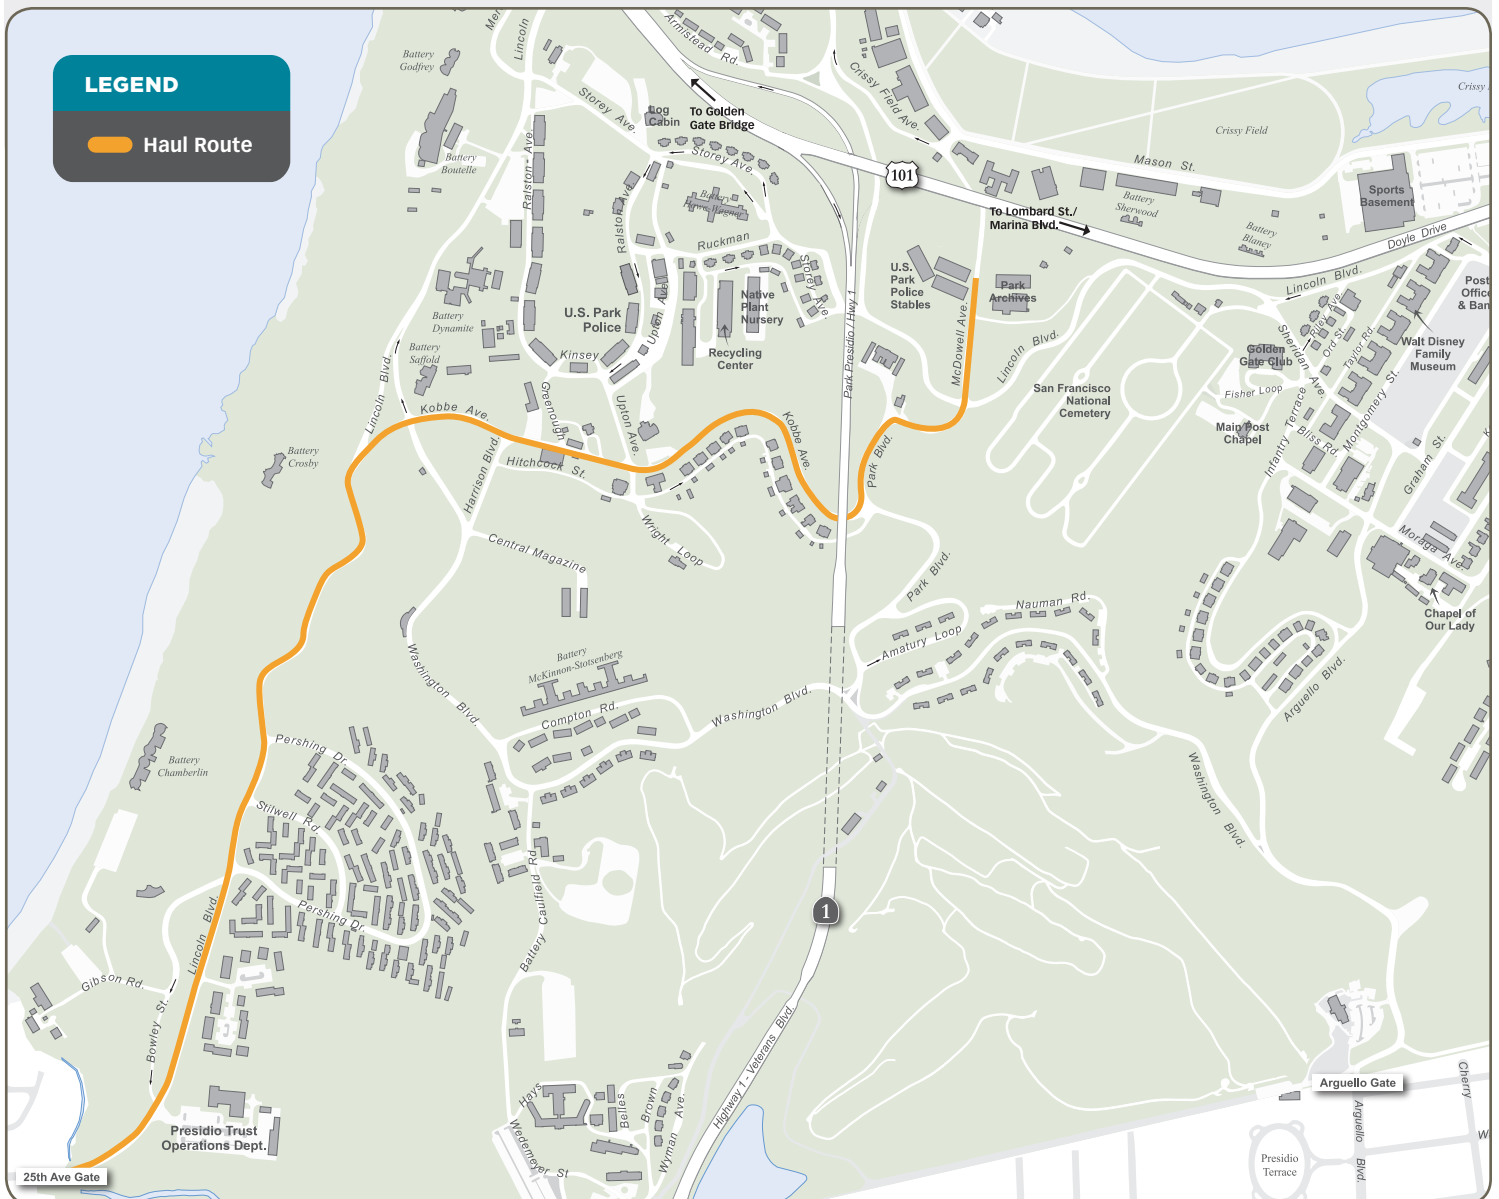

## EARLY MORNING TRUCK TRIPS - SEPTEMBER 22-25, 27-28

From Wednesday, September 22 through Tuesday, September 28 (excluding Sunday, September 26) two trucks per night will haul 105-foot-long beams into the Presidio **between 3:00 am to 5:00 am** (see haul route map included). The trucks will be escorted by pilot cars.

The pet cemetery will be closed to the public from September 22 through late 2011.

These beams will be used to build the base for the temporary support structure that will span the pet cemetery in order to build the new southbound high viaduct. There will be early morning work in the Cavalry Stables area to off-load the beams.

Please call our project information line at (415) 263-5953 or visit [www.PresidioParkway.org](http://www.PresidioParkway.org) for up-to-date information.

## CONSTRUCTION MILESTONES

### ABOUT THE DOYLE DRIVE REPLACEMENT PROJECT

The replacement of Doyle Drive with the Presidio Parkway is a collaborative effort led by the California Department of Transportation, the San Francisco County Transportation Authority, and the Federal Highway Administration.

Doyle Drive is structurally and seismically deficient and must be replaced. The roadway is facing the same problem that threatens other crucial components of the nation's infrastructure – the ravages of time and continual use. Originally built in 1936, Doyle Drive has reached the end of its useful life. The Presidio Parkway is based on a world-class design that will improve the seismic, structural and traffic safety of the roadway. It also will be more sensitive to community needs and to the national park setting, reducing impacts on biological, cultural, historical and natural resources and on the surrounding neighborhoods.

#### Highlights of the new design include:

- A parkway with two sets of short tunnels, a wide landscaped median, traffic calming transitions to city streets and the inclusion of safety shoulders
- A spectacular regional gateway that respects the natural contours of the surrounding area and complements the unique environment of San Francisco and the Presidio, a national park
- New direct access to the Presidio and enhanced views
- A more centralized location for transit connections
- Enhanced pedestrian connections within the Presidio to the Main Post, Crissy Marsh, the National Cemetery and historic batteries
- Reduced light and noise intrusion at Crissy Field.

### CONSTRUCTION OVERVIEW

Construction of the Doyle Drive replacement, the Presidio Parkway, began in December 2009, more than a year ahead of schedule, due to \$122 million from the American Recovery and Reinvestment Act of 2009.

Construction of the new roadway will take approximately four years to complete and has been planned in two major phases in order to keep traffic flowing during the replacement. Seismic safety will be achieved in late 2011 after the completion of the first phase.

Construction is expected to be complete in 2014 and will be followed by an extensive landscaping program. An ongoing series of advisories will update the public about what to expect as work progresses.
